

## Bosch Rexroth expands product portfolio to include filtration systems for mobile and industrial applications in the U.S.

Rexroth's acquisition of Eppensteiner filtration has enabled the company to extend its offering of hydraulic accessories, service and retrofitting capabilities in the United States.

For Immediate Use

Rexroth offers a complete portfolio consisting of filters and filter elements with the latest technology for the highest performance.

### **Since the acquisition of K & H Eppensteiner, Bosch Rexroth has expanded its product portfolio to include fluid filters for installation in hydraulic and lubrication oil systems.**

Now available in the U.S., Bosch Rexroth offers a complete portfolio consisting of filters and filter elements with the latest technology for the highest performance. Included are air breathers, high-pressure filters that connect directly to hydraulic manifold blocks, duplex filters, spin on, tank mounted return line filters as well as in-line filters for low, medium, and high operating pressures. Our filters distinguish themselves by application specific designs and optimized flow characteristics with low-pressure drops. Optimal filtration of hydraulic fluids and lubricants provide direct wear protection for downstream components and systems.

For Immediate Use

In addition, Rexroth filters focus on a low-maintenance design. For example, the large filters consist of a two-part housing for a simpler filter exchange. Rexroth filters are equipped with a visual contamination indicator as standard and are available with SAE threads and flanges for the North American market.

We also deliver our customers “will fit” elements that directly replace other hydraulic element suppliers via our conversion software called FEUS.

*Bosch Rexroth AG is one of the world's leading specialists in the field of drive and control technologies. Under the brand name of Rexroth the company supplies more than 500,000 customers with tailored solutions for driving, controlling and moving. Bosch Rexroth is a partner for industrial applications and factory automation, mobile applications and renewable energy. As The Drive & Control Company, Bosch Rexroth develops, produces and sells components and systems in more than 80 countries. In 2009 Bosch Rexroth, part of the Bosch Group, achieved sales of around \$5.7 billion with 34,200 employees.
