

Aluminum Structural Framing for Medical Applications

Our framing systems can help support the needs of medical providers to scale up their operations. Take a look at some examples of how Bosch Rexroth can help!

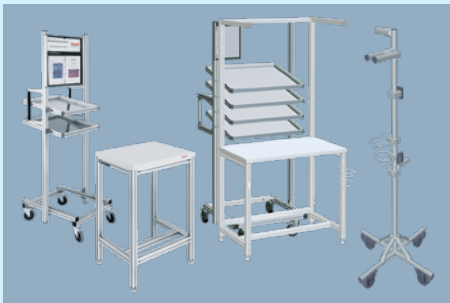

Temporary isolation rooms

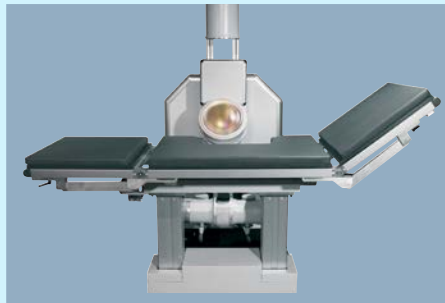

Patient isolation cubicles

Labs and clean areas

Carts, test cells

Medical tables

Medical beds

How we can help

Bosch Rexroth can help right now. We have proven products available to help you build new, in-demand machines or systems fast, as well as modular, easy-to-assemble workstations and powered conveyor systems ready to integrate into your operations.

- **Medical equipment assembly and ventilator hoods:** Aluminum structural framing to fabricate carts
- **Linear motion for lab and diagnostics machines:** Stainless steel miniature ball rails and miniature ball screws
- **Automated fluid handling systems:** Complete Cartesian motion systems
- **Fast-expanding manual assembly lines:** Workstations, carts and flow racks
- **Increased throughput:** Modular conveyor systems to link workcells
