

## Executive Session

hosted by Bosch Rexroth

Engineering the  
Factory of the Future  
with data-driven,  
smart automation

April 17<sup>th</sup>, 4:00–5:00 p.m.  
Drive for Technology

Four walls, a roof and the factory floor – there will not be many more fixed components than these in the Factory of the Future. Machines and systems will communicate wirelessly, and thanks to the variable layout, the production equipment will prepare itself independently and flexibly for new orders.

Join the **Factory of the Future Executive Session** hosted by Bosch Rexroth on **April 17th, 4:00 – 5:00 PM** at the **CMAFH's Drive for Technology** as **Dr. Heiner Lang, CEO Automation & Electrification at Bosch Rexroth**, discusses:

- The business value of connecting your factory to the Internet of Things
- Use cases and best practices based on Bosch Rexroth's experience as both a lead user and lead provider of smart shop floor solutions
- The required steps to help Executives plan and implement the Factory of the Future

Get a preview of Dr. Lang's presentation [here](#).
