

**Don't wait!**

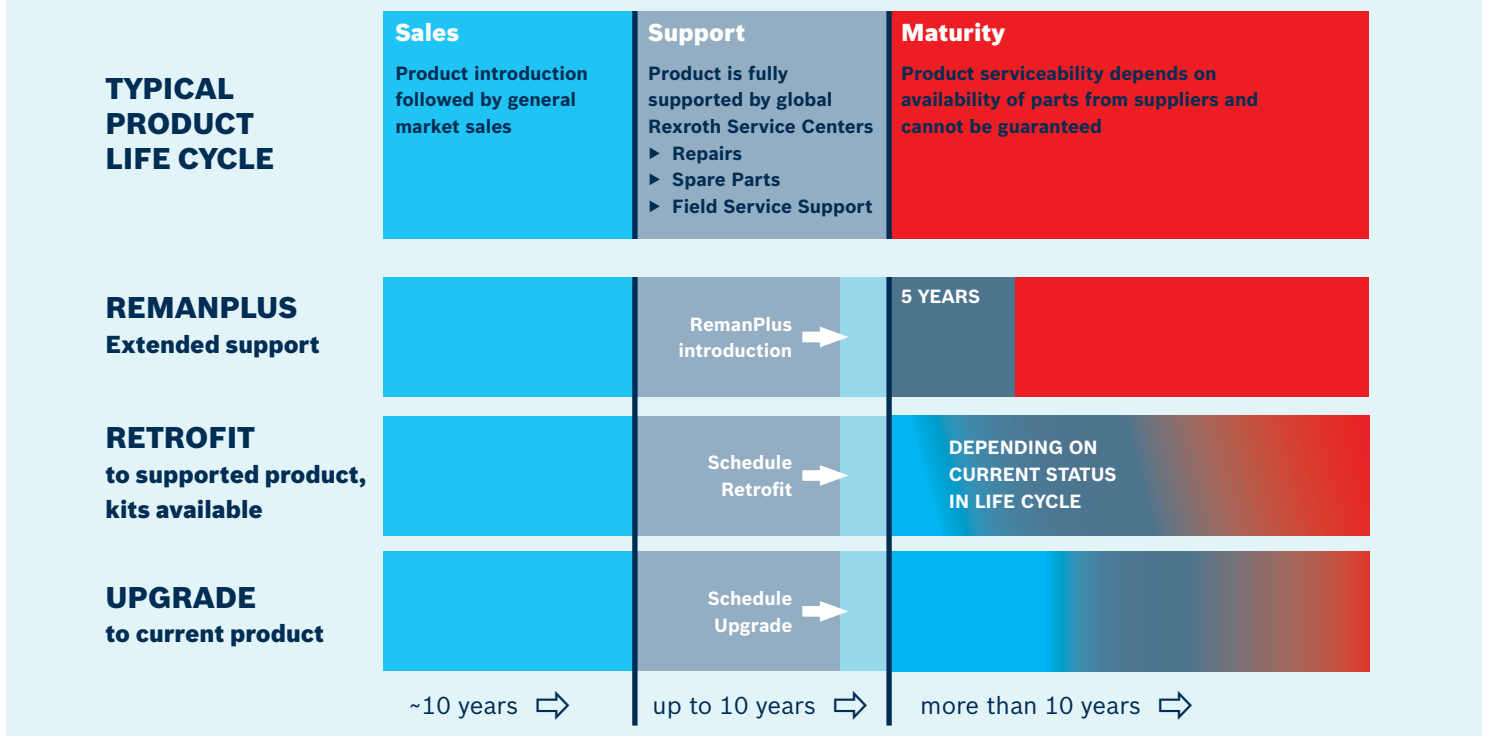

**Extend the serviceability  
of your machines now**

# Where is your machine in its life cycle?

Are your machines producing reliably but showing signs of age? Production machinery can last more than 20 years. With the constant development of electronic components your machinery may outlast the availability of the components driving it. Act now and extend the life of your machine.

## Options to extend the life of your machine while reducing TCO (Total Cost of Ownership)

### RemanPlus

With RemanPlus we can bring all of the drive & control products on your machine back to 'like new' condition to ensure continued operation. We guarantee availability of your equipment for 5 years beyond its maturity date.

### Retrofit

For machine life extension greater than 5 years beyond maturity date, we have retrofit solutions ready for you. Retrofits are a cost-efficient way to add many years of reliable production time to your equipment. Installation and setup can be completed in one step or several phases – depending on your needs.

### Upgrade

For longer term plans, an upgrade to the newest Rexroth technology will provide many years of continued production along with support and serviceability well into the future.

**TURN BACK TIME! Contact us to discuss a solution that's best for you.**

# Take out the risk of a machine breakdown in 5 steps:

## Don't wait for a breakdown

Continue production on your machine despite its age. We want to work proactively with you to ensure that your equipment will perform.

### Advantages of a proactive approach:

- ▶ Extended machine life
- ▶ Reduced risk for breakdown
- ▶ Cut service costs: Unit price of a current system is considerably lower than a mature product
- ▶ Improved diagnostics and overall handling with state-of-the-art technology
- ▶ Scheduled shutdown
- ▶ Budgeted costs

## Do any of these mature INDRAMAT products look familiar?

## Options for mature products: an example with RAC

1

**UNDERSTAND** the requirements and identify mature products in your plant

2

**DETERMINE** your machine life requirements

3

**CONSULT** Bosch Rexroth team for best retrofit package

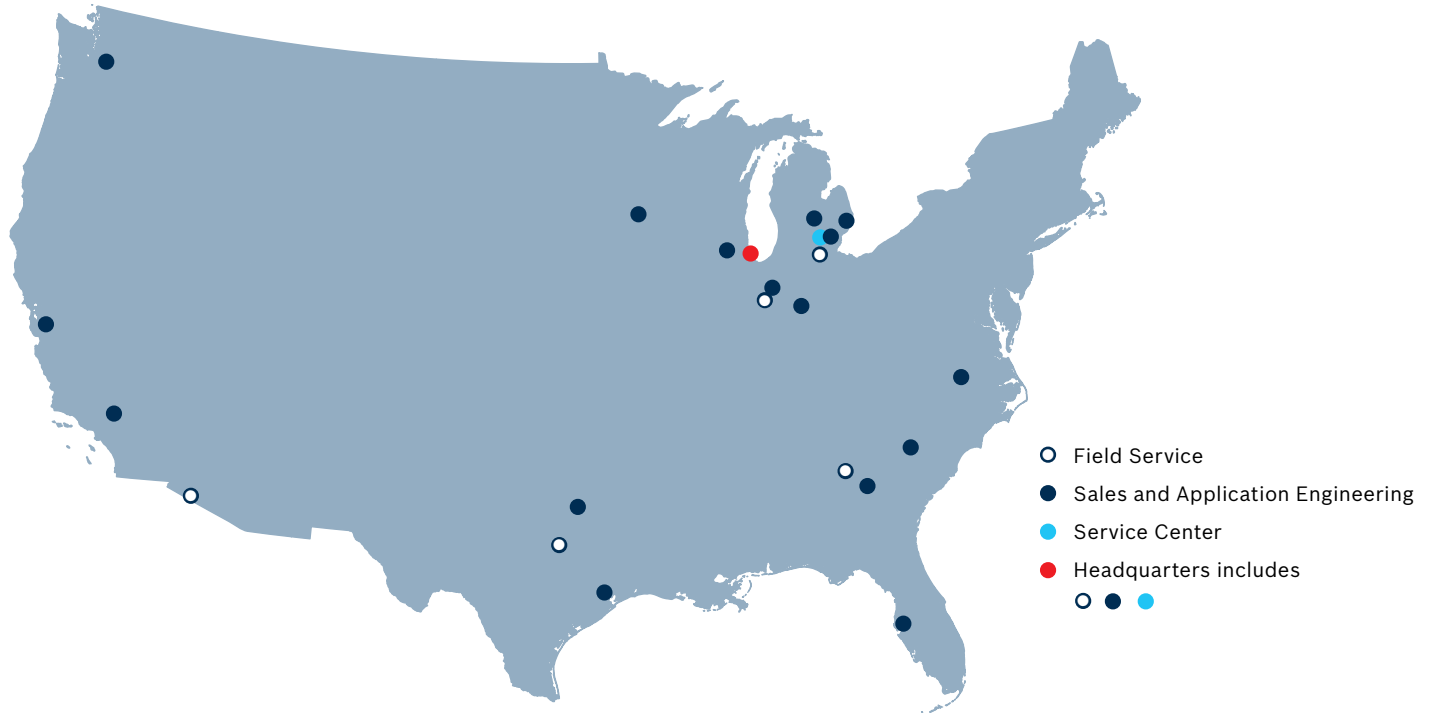

4

**ARRANGE** time for retrofit

5

**Onsite STARTUP** with support from Rexroth
